PROFILE

Frontend specialist and TypeScript enthusiast focusing on performant UI architecture.

EDUCATION

B.S. in Software Engineering, Georgia Tech (Expected Dec 2025)

SKILLS

TypeScript, JavaScript, React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, REST API, Git, Next.js, Jest

EXPERIENCE

Frontend Engineering Intern at Datadog

- Architected reusable React.js component library in TypeScript, reducing UI code duplication by 35%.
- Integrated REST APIs with Redux Toolkit for seamless state synchronization across 5 micro-frontends.
- Accelerated initial page load speed by 280ms through code-splitting and asset optimization.

PROJECTS

OmniDocs Markdown Editor (React, TypeScript, Tailwind CSS)

- Built collaborative rich-text editor supporting live preview and PDF exports with 10k+ downloads on GitHub.
- Connected client to backend REST endpoints for cloud storage and version history.

ACHIEVEMENTS

Dean's List 4 Consecutive Semesters
